Poll Everywhere

Integrating with Blackboard

Poll Everywhere syncs with your LMS

Poll Everywhere is the perfect complement to instruction, with flexible, real-time polls, quizzes, and surveys. Present activities from the web or in slideware, and send the results to Blackboard.

Import student rosters

Easily import course rosters into Poll Everywhere. New accounts are created automatically for every student, so they can participate in Poll Everywhere activities straightaway. This eliminates the need for spreadsheet uploads and student self-registration.

Export student grades

Export a Gradebook report from Poll Everywhere to Blackboard. This includes students' overall participation scores, as well as any graded multiple-choice or clickable image questions.

Embed any activity

Use the Item tool in Blackboard to embed any Poll Everywhere activity into a Blackboard website. Present activities directly within Blackboard, as well as in PowerPoint, Keynote, or Google Slides.

For department- and university-wide accounts

Blackboard integration is available exclusively for department-wide and university-wide accounts. It is highly recommended for groups of five or more professors. Speak with a Poll Everywhere representative to learn more.
