

Integrating with Moodle

Poll Everywhere syncs with your LMS

Poll Everywhere is the perfect complement to instruction, with flexible, real-time polls, quizzes, and surveys. Present activities from the web or in slideware, and send the results to Moodle.

Import student rosters

Easily import course rosters into Poll Everywhere. New accounts are created automatically for every student, so they can participate in Poll Everywhere activities straightaway. This eliminates the need for spreadsheet uploads and student self-registration.

Export student grades

Export a Gradebook report from Poll Everywhere to Moodle. This includes students' overall participation scores, as well as any graded multiple-choice or clickable image questions.

Combine with single sign-on

Simplify your Moodle integration with the convenience and security of SSO. This feature is an optional addition to Moodle integration, and is available upon request.

For department- and university-wide accounts

Moodle integration is available exclusively for department-wide and university-wide accounts. It is highly recommended for groups of five or more professors. Speak with a Poll Everywhere representative to learn more.
